PROFESSIONAL SUMMARY

Flutter Developer with 1+ year of industry experience delivering production-grade mobile applications for Android and iOS, currently pursuing a Bachelor of Engineering in Software Engineering. Proficient in Dart, Flutter, RESTful API integration, Firebase, Supabase, and state management patterns including Provider and BLoC for scalable app architecture. Experienced in writing unit and widget tests using flutter_test, implementing CI/CD pipelines with GitHub Actions, and managing Google Play and App Store releases. Known for translating complex requirements into clean, maintainable code and collaborating effectively within Agile cross-functional teams.

TECHNICAL SKILLS

Languages: Dart, JavaScript, SQL

Framework / SDK: Flutter, Flutter Web

State Management: Provider, BLoC, GetX, Riverpod

Backend / APIs: Firebase (Firestore, Auth, Cloud Functions, FCM), REST APIs, Supabase, Node.js

Testing: Unit Testing, Widget Testing, Integration Testing, flutter_test,

CI/CD & DevOps: GitHub Actions, Git, GitHub, Google Play Console, App Store Connect

Architecture: MVVM, Clean Architecture, BLoC Pattern, Repository Pattern, Dependency Injection

Storage: Hive, SQLite, SharedPreferences,

PROFESSIONAL EXPERIENCE

Flutter Developer | Qodex Software | June 2024 – Present

Includes 3-month onboarding engagement at Crafters (June–August 2024), subsequently transitioned to full-time role at Qodex Software.

- Delivered 8+ new features for a production-grade Flutter application, contributing to a 15% increase in user engagement measured via Firebase Analytics.
- Engineered pixel-perfect UI screens using Flutter, Dart, and Provider, reducing average screen load time by 20% through widget tree optimization and efficient state management.
- Integrated Firebase Authentication and Supabase, enabling secure sign-in and real-time data access for registered users across Android and iOS.
- Implemented CI/CD pipelines using GitHub Actions and Codemagic, cutting the release cycle from 5 days to under 1 day and eliminating manual deployment steps.
- Optimized application startup time by 25% through lazy loading, widget tree refactoring, and profiling with Flutter DevTools.
- Collaborated with Node.js backend systems to consume scalable REST APIs, ensuring reliable data flow between client and server for real-time features.
- Applied Clean Architecture and MVVM patterns across 3 projects, improving codebase maintainability scores in code reviews by 40%.
- Participated in Agile/Scrum ceremonies — sprint planning, daily stand-ups, and retrospectives — within a cross-functional team of designers, backend engineers, and QA analysts.

KEY PROJECTS

AutoBike — Showroom Sales Management Application — *Flutter, Provider, Supabase*

- Developed a cross-platform mobile application for showroom sales management, reducing daily data-entry time by 30% for non-technical staff across 2 dealerships.
- Implemented real-time sales records, inventory tracking, and performance dashboards via Supabase, processing 100+ daily transactions with zero data-loss incidents.
- Wrote unit and widget tests covering 85% of the codebase using flutter_test, ensuring feature stability across 3 major releases.
- Designed a streamlined interface using Material Design principles, reducing user onboarding time from 2 hours to under 30 minutes.

Event Management System — *Flutter, Provider, Firebase*

- Built an event discovery and booking application integrated with Firebase.
- Developed an admin dashboard enabling real-time monitoring of event registrations and user activity for concurrent events.
- Implemented Firebase Authentication and Firestore-based cloud data handling, supporting secure operations for registered event attendees.

MilkarChalo — Ride-Sharing Application — *Flutter, Node.js, MySQL*

- Collaborated on a ride-sharing application using Flutter for the mobile frontend and Node.js with MySQL for the backend API, contributing to a codebase serving 1,000+ test users.
- Implemented core features — ride booking, driver-passenger coordination, and real-time location-based data handling — reducing average booking completion time by 18%.

EDUCATION

Bachelor of Engineering in Software Engineering

Quaid-e-Awam University of Engineering Science and Technology | 2023 – 2027 | In Progress

CERTIFICATIONS

- Working with Onscreen Data in a Flutter App — Google Cloud Skills Boost (Coursera), 2025
- Flutter Qwik Start — Google Cloud Skills Boost (Coursera), 2025

LANGUAGES

- English — Professional working proficiency
- Urdu — Native proficiency
- Sindhi — Native proficiency

VOLUNTEER EXPERIENCE

Flutter Community Mentor | Online | 2024 – Present

- Mentored 10+ beginner Flutter developers through online forums, code reviews, and 1:1 sessions, helping participants build and deploy their first mobile applications.
